

TCD 2015

For agricultural machinery

240 - 500 kW | 322 - 670 hp at 1900 - 2100 min⁻¹ | rpm

EU Stage IIIA / US EPA Tier 3

- Water-cooled V6 and V8 engines with turbocharging, charge air cooling and four-valve technology.
- Very compact engine design reduces the installation costs.
- Wet cylinder liners, long oil change intervals and easy changing of the engine fluids reduce the running and service costs and increase the availability of the machinery.
- Best cold starting properties even under extreme conditions.

- The V6 is also available as a flat version for extremely compact installations.

- Low noise emissions due to acoustically optimized components with very smooth running and high durability.
- Electronic, solenoid valve-controlled DEUTZ MV-System® (pump-line-nozzle) ensures optimum engine performance at low consumption.
- The robust engine design allows worldwide operation even with high sulphur fuels.
